

## The Lincoln Electric Company

### Who We Are

We are a **global manufacturer** of **high quality** welding, cutting and joining products. Our enduring **passion** for the development and application of our technologies allows us to create complete **solutions** that make our customers **more productive** and successful. We distinguish ourselves through an unwavering **commitment** to our employees and a **relentless drive** to maximize customers' value.

### Corporate Overview

Founded in 1895 by John C. Lincoln, Lincoln Electric has become the worldwide leader in arc welding and cutting products. Lincoln Electric serves its customers with a global presence, world-class technical sales force and continuous investments in research and development. Our broad welding product portfolio has established a strong global brand that has served our diversified customer segments for almost 100 years.

**I CHOOSE LINCOLN...<sup>SM</sup>**

**TO COMPLY WITH BUY AMERICA REGULATIONS**

Lincoln Electric  
introduces **Buy  
America** welding

consumables to meet the **Buy America**  
requirements for infrastructure rebuild  
projects related to the **American Recovery  
and Reinvestment Act of 2009 (ARRA)**.

**Buy America** requirements are applicable  
to most ARRA funded projects and mandate  
that contractors involved in infrastructure  
rebuild must use welding consumables  
made with steel melted in the U.S.

Lincoln offers several products made  
with green rod or strip melted in U.S.  
steel mills.

# BUY AMERICA PRODUCTS

## Flux-Cored Wire

UltraCore<sup>®</sup> 71C, 71A85 & 71A75 Dual  
(E71T-1C/-9C; E71T-1M/-9M; and both)

- Premium arc performance and bead appearance
- Fast freezing slag for out-of-position welding
- ProTech<sup>®</sup> foil bag packaging

## Stick Electrode

Excalibur<sup>®</sup> 7018 MR & 7018-1 MR  
(E7018 H4R, E7018-1 MR)

- Premium arc performance
- Effortless slag removal
- Square coating burn-off
- Easy strike and re-strike

## Submerged Arc Wire & Flux

Lincolnweld<sup>®</sup> LA-75 & L-61  
(ENi1K, EM12K)

- LA-75 is a low carbon, medium manganese, high silicon, nickel-bearing electrode designed for use with Lincolnweld<sup>®</sup> neutral fluxes.
- L-61 is a low carbon, medium manganese, low silicon general purpose submerged arc electrode.
